

Office of Materials and Testing Qualified Products List

The following is a list of **Pavement Reinforcement Fabrics** that has been evaluated by the Office of Materials and Testing. These fabrics have proven their capability of meeting the requirements of Standard Specification Sections: 881.2.06, Type I & II and 881.2.06, Type High Strength Pavement Reinforcement Fabrics, and have satisfied the requirements of SOP-17, "Acceptance of Miscellaneous Construction Items".

QPL-40 Pavement Reinforcement Fabric

Physical / Chemical Branch
15 Kennedy Dr.
Forest Park, GA 30297
Office Phone: 404-608-4810
Office Fax: 404-608-4752

Note: All Trade Names are Registered Trademarks of the appropriate company.
Ending Source # is 009

Note #1: **Type I:** Heat resistant non-woven polypropylene or polyester fabric capable of being placed smooth without wrinkles and being saturated with asphalt cement.

Type II: Heat resistant non-woven polypropylene or polyester fabric capable of being placed smooth without wrinkles and being saturated with asphalt cement. May have self-adhesive backing adhered to a film release liner.

Type High Strength: A flexible water resistant high density asphaltic membrane laminated between two layers of high strength, heat resistant polypropylene or polyester geo-textile and be capable of being placed smoothed without wrinkles with mechanical device. May have self-adhesive backing adhered to a film release liner.

Note #2: Pavement Reinforcement Fabrics found on this QPL may be accepted by Manufacturer Certification as described in Section 881. Pavement Reinforcement Fabrics not found on this list require a Manufacturer Certification as described in Section 881 and shall be sampled and tested by the Office of Materials and Research before being allowed for project use.
